**DOCKETED**

**JAN 12 2007**

Dear Commissioner Mayes:

First, we want to wish you a very happy and healthy holiday season and 2007.

We have had out-of-town family visiting recently and one of the individuals staying with us was our brother-in-law. He works for Olin Chemical Plant in Cleveland, Tennessee. They apparently manufacture chlorine. To get to the point....we were driving down McDowell, by our office, and he said "if ever I am lost, I know how to find your office, just by the stench." He then told us he supposedly has "no sense of smell" after working 30+ years with chlorine, yet he can still smell LPSCO. We were away from the office mostly from the 18<sup>th</sup> of November on; however, each time we did stop in, we could certainly smell the foul odor. If they think they are going to fix it by the end of December, they had better hurry up. It smelled yesterday as well as last night.

We are also enclosing a copy of a letter printed in the *West Valley View* newspaper recently. It is not about us, but didn't know if you were aware of this other problem as well.

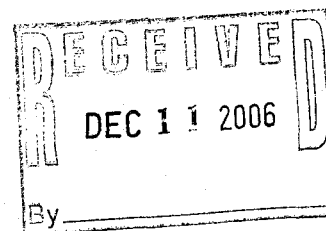

If there is anything we can do on this end to help in the matter, please let us know. In any case, again, we wish you a very happy holiday and wonderful 2007.

Sincerely,

Janet and Richard Kirshbaum

## City awaits with bated breath

Editor:

I appreciate the numerous complaints from Goodyear residents who are raising a stink over the foul odors emitted from LPSCo and the lack of action from the "our hands are tied" City Council and mayor. Their irritation is well founded with these water recyclers who have failed from the beginning to live up to the promise of being unnoted for what they do.

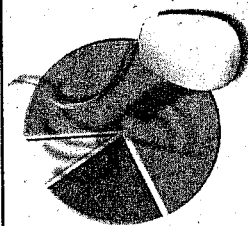

The real concern of our citizens, however, should probably be focused on our smelly recycler in southern Goodyear.

Insanet of Arizona, according to the Dioxin Toxics Release Inventory Fact Sheet produced by the EPA dated May 2005, was third in dioxin and dioxin-related chemical release in EPA Region 9, which includes Arizona, California, Hawaii, Nevada and the Pacific Islands. To put that in perspective, this is almost 10 times the amount released by the massive Chevron refinery in El Segundo, Calif.

The EPA goes on to report that chromium, lead and nickel are also released from the plant.

With the recent exodus of Rubbermaid and Timco, I realize we need employers in Goodyear, particularly in light industry and manufacturing. We do not, however, need another Superfund site; we already have that distinct honor.

I know it stinks in north Goodyear, but here in the south it stinks and it could be killing us! Personally, I recommend that all

# Online Poll

## LAST WEEK'S QUESTION

The West Valley View is trying to determine if there is any interest among our readers in coverage of the Phoenix Coyotes hockey team. You can help us out by choosing one of the following options:

- I have no interest in the Phoenix Coyotes — 30%
- I would like to see occasional articles, but not necessarily coverage of every game — 23%
- I would like to see heavy coverage of the Coyotes, even if it means eliminating some of the high school sports coverage — 25%
- I would like to see heavy coverage of the Coyotes, but only if it doesn't affect the level of high school sports coverage — 22%

Total votes: 211

Take the View's online poll at the bottom of the home page of our Web site, [www.WestValleyView.com](http://www.WestValleyView.com).

The View's online poll is not a scientific public opinion poll.

who live or work in our fair city hold your breath until something is done about it.

Ivey Deal  
Goodyear

## THIS WEEK'S QUESTION

How do you expect your holiday expenditures to be this year compared to last year?

- I expect to spend more
- I expect to spend less
- I expect to spend about the same amount
